Exercise 1

for the exercices i just add the comment in one exo1.py and the other is the same thing cause of that i dont write the comment i hop that you will accecept that

for the reversing i just put the accelration in the 0.0 and the break is true then it have to go back and reverse

also if we do (steer (right or lift) + drift + brake) we can change the direction but cause the time is short i just chose the short
